

Vishal Singh

Senior Full-Stack Developer (.NET | React | Node.js)

✉ vishalkdots@gmail.com ☎ +91 9351488682 📍 Jaipur, Rajasthan

SUMMARY

Senior Full Stack Developer with 6+ years of experience building high-traffic travel booking platforms using ASP.NET Core, React.js, and Node.js. Specialized in GDS and NDC API integrations — including Amadeus, Sabre, Galileo, and Travelport — with hands-on experience delivering end-to-end flight, hotel, and package booking systems for B2B and B2C markets. Led development of 8+ live platforms as Tech Lead, integrating 15+ third-party APIs, multiple payment gateways (Stripe, PayPal, Razorpay), and microservices architectures. Passionate about building scalable, performant systems that handle real-world booking complexity at scale.

SKILLS

.NET Technologies

Languages/Frameworks: C#, ASP.NET, ASP.NET MVC, ASP.NET Core, Entity Framework, LINQ, Microservices Architecture

Backend Development

- ASP.NET / ASP.NET Core Web API
- Node.js
- Third-Party API Integration (Travel Domain)
- AJAX, JSON, XML

Third party APIs

- **Flight Booking APIs:** Amadeus, Sabre, Travelport, Galileo, Mystify, Duffel, Skyscanner, Travel Boutique, Sirena / Mixvel
- **Hotel Booking APIs:** Hotelbeds, Travellanda, RateHawk, Stuba, Travel Boutique
- **Payment Gateway:** Stripe, PayPal, Razorpay, Square, PayU

Frontend Development

React, Angular, React Native, HTML, CSS, SCSS, JavaScript, TypeScript, jQuery

Database

MS SQL Server, MySQL, MongoDB

EDUCATION

BCA, University of Technology, Jaipur

12th Standard, RBSE, Ajmer

10th Standard, RBSE, Ajmer

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer, Team India Web Design

08/2020 – Present

- Developed scalable enterprise applications using ASP.NET Core, React.js, and Node.js.
- Created RESTful APIs and microservices for web and mobile applications.
- Built dynamic frontend components using React.js and modern JavaScript.
- Integrated third-party APIs, authentication systems, and payment gateways.
- Improved application performance and optimized backend processes.
- Worked with SQL Server and MongoDB for efficient data management.

Jaipur, India

- Participated in code reviews and mentored junior developers.

KEY PROJECTS

GDSPNR – Subscription-Based Travel Booking Platform , Role: Tech Lead & Sr. Full-Stack Developer

- Developed a subscription-based travel booking platform for agencies and business clients
- Implemented flight, hotel, tour, and flight + hotel booking modules
- Integrated multiple flight APIs including **Sabre, Amadeus, Galileo, Mystifly, Kiwi, Babylon, and TripJack**
- Integrated **HotelBeds** and **Travellanda** hotel APIs
- Integrated **Stripe, PayPal, Paystack, and Klarna** payment gateways
- Developed dynamic membership and subscription management system
- Built scalable REST APIs and optimized booking workflows

KabulTrip – Multi-Supplier Flight Booking System , Role: Tech Lead & Senior ASP.NET Developer

- Developed a flight booking platform with multi-supplier flight aggregation
- Integrated **BiletBank, OneAPI, and PKFare** flight APIs
- Implemented **custom flight** creation and supplier **combination management** from admin panel
- Developed unified search results combining multiple supplier responses
- Built dynamic admin controls for flight and supplier management

SastiFlight – Hold Flight Booking B2C Platform , Role: Tech Lead & Full-Stack Developer

- Developed a B2C hold flight booking system
- Integrated **Galileo GDS** and **Emirates NDC** APIs
- Built fully dynamic admin management system
- Implemented booking workflow and fare management features
- Optimized booking and reservation performance

Invoice & Insurance Management System , Role: Full-Stack Developer

- Developed an insurance and invoice management system for travel operations
- Built modules for **invoice generation, receipt management, and insurance tracking**
- Implemented category-wise insurance management functionality
- Developed automated reminder and notification features for insurance renewals and payments
- Built dynamic invoice and receipt generation workflows
- Developed admin management modules for customer, policy, and financial operations
- Optimized reporting and document management processes

The Center Tours – Travel Package Booking Platform ,

Role: Tech Lead & Senior Full-Stack Developer (React | Node.js)

- Developed a complete travel package booking platform
- Integrated **Sabre** Flight API, **HotelBeds** API, and **Viator** API
- Built modules for flights, hotels, tours, and adventure activities
- Developed scalable backend APIs and responsive frontend features
- Improved booking flow and customer experience

GetFlyDeal – Multilingual Flight Booking Platform , Role: Tech Lead & Full-Stack Developer

- Developed bilingual flight booking platform supporting English and Arabic
- Integrated **Mystifly** Flight API
- Integrated **Moyasar** and **Stripe** payment gateways
- Built multilingual UI and dynamic booking workflows
- Optimized responsive design and payment processing

ASAP Fly – Flight Reservation System , Role: Full-Stack Developer (React | Node.js)

- Developed real-time flight reservation platform
- Integrated **Amadeus** Flight API
- Built scalable backend booking services

- Developed responsive frontend booking modules
- Optimized API response and booking performance

The FareX – B2B Flight Booking Portal , Role: Tech Lead & Senior Full-Stack Developer

- Developed advanced B2B flight booking and agency management portal
- Integrated **Amadeus WSDL, Sabre, Jazeera Airways, and OneAPI**
- Implemented ticketing, PNR retrieval, split PNR, seat selection, and baggage management
- Developed multi-PCC code management system
- Built agent booking and ticket management workflows

Havo24 – Russian Flight Booking Platform , Role: Tech Lead & Senior Full-Stack Developer (React | Node.js)

- Developed a Russia-based flight booking platform for travel agencies and customers
- Integrated Russian flight supplier APIs including **Avtra, Sirena, Mixvel, SIG, and Ural**
- Built scalable flight booking and fare management workflows
- Developed responsive frontend modules using React.js and backend APIs using Node.js
- Optimized high-volume flight search and booking performance
- Implemented supplier-wise booking management and API handling processes
- Managed third-party API integrations and system architecture development
